

New York Slim Modular Chiller

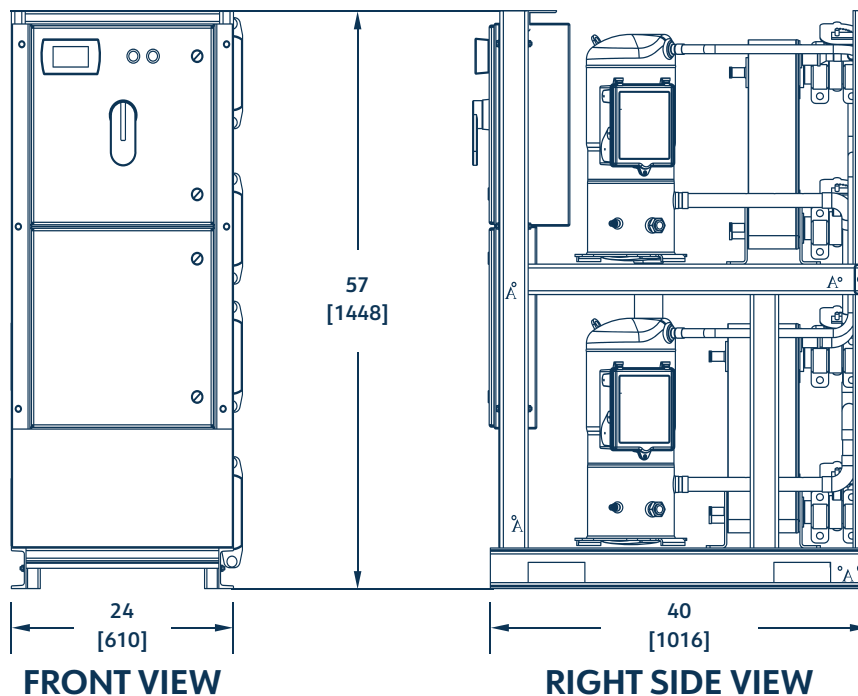

Continued product development with engineers and service professionals has resulted in the reinvention of our most versatile modular chiller.

The ChillMaster® Team has tailored to the exact needs of New York City's buildings to introduce the New York Slim Modular Chiller. Now, even more compact, the 24" wide design allows systems to easily move around corners, fit onto elevators, and through access doors.

The New York Slim Modular Chiller capacity ranges from 10 - 30 tons per module, with up to 10 mods per bank (≤300 Tons). Each individual module can be isolated without shutting down the entire system, making field assembly and service access a quick and simple process.

Model #	Water Temp	Capacities	Refrigerant	Voltage	W x D x H (in.)
CMMC-NY(10-30)xNWxxPSA	40°F	10 - 30 Ton	R410a/R454b	208/230v, 380v, 460v, 575v	24 x 40 x 57

NOTES:

1. Dimensions are shown in inches. Dimensions in [] are in millimeters
2. Mounting holes marked A in 6 locations (9/16" Diameter)
