

Surgical, Pharmacy & Lab Chiller

34°F Glycol-Free Cooling for Mission-Critical Environments

Experience unparalleled cooling precision with the ChillMaster Surgical, Pharmacy & Lab Modular Chiller.

Delivering 34°F chilled water without glycol additives, our system ensures optimal performance for hospitals, pharmacies, and laboratories. With no need to monitor glycol concentrations or address its breakdown, ChillMaster simplifies daily operations and maintenance.

Say goodbye to clogs and the routine hassles that come with glycol-based systems, while achieving enhanced cooling performance and greater energy efficiency for your most demanding environments.

Key Features & Benefits

- **34°F Glycol-Free Cooling:** No glycol. No mess. No maintenance headaches!
- **Modular Design:** Adaptable capacity from 10 to 60 tons, expandable up to 600-ton banks for large applications.
- **Simplified Maintenance:** Minimize downtime with intuitive components and single-point electrical connections for faster and easier servicing.
- **Space-Saving Design:** At just 34" wide, this chiller offers powerful cooling without taking up valuable room.
- **Smart Monitoring:** 24/7 Remote Program Monitoring (RPM) provides real-time data, alerts, and advanced diagnostics.
- **Noise Reduction:** Optional acoustic panels and compressor covers are available to minimize noise.
- **Resilience and Redundancy:** Optional redundant module operations and head pressure control valves for continuous operation, even during maintenance.
- **American Quality:** Proudly made in Murfreesboro, TN
